

**AMENDMENTS TO THE CLAIMS**

This listing of claims will replace all prior versions, and listings, of claims in the application.

**Listing of Claims:**

1. (Previously Presented) A lint filter assembly for a dryer comprising:  
  
a door;  
  
a lint filter including a filter housing installed at a rear of the door and a filter main body inserted into the filter housing; and  
  
at least one securing member for securing the filter main body to the filter housing[[,]];  
  
~~wherein the securing member includes~~ a convex portion formed at the securing member  
and configured to contact the filter; ~~main body;~~ and  
  
a supporting protrusion spaced away from the convex portion, wherein the filter main body is inserted into the filter housing, the convex portion is convex towards the supporting protrusion to be supported by the supporting protrusion ~~to support the convex portion when the filter main body is seated in the filter housing.~~
2. (Original) The lint filter assembly according to claim 1, wherein the filter housing has a guide rail formed therein for guiding the filter main body therein.
3. (Original) The lint filter assembly according to claim 2, wherein the securing member is formed at a bottom portion of the guide rail.
4. (Original) The lint filter assembly according to claim 2, wherein the securing member is formed perpendicularly to the guide rail.

5. (Canceled)

6. (Previously Presented) The lint filter assembly according to claim 1, wherein the convex portion has a predetermined elasticity.

7. (Original) The lint filter assembly according to claim 1, wherein the filter main body is pressed firmly by the securing member against a rear of the filter housing.

8. (Canceled)

9. (Previously Presented) The lint filter assembly according to claim 1, wherein the convex portion has a deformation degree limited by the supporting protrusion.

10. - 12. (Canceled)

13. (Currently Amended) The lint filter assembly according to claim ~~[[10]]~~ 1, wherein the filter main body inserts into the filter housing from a top or a side.

14. (Canceled)

15. (Currently Amended) The lint filter assembly according to claim ~~[[10]]~~ 1, wherein the pressing member protrudes in a direction so that the pressing member presses the filter main body against a rear of the filter housing.
